

## How to Evaluate Your Technology Curriculum Vendor

At K to the 8<sup>th</sup> Power, our goal is to provide a product that meets the needs of the computer technology teacher both academically and technologically. This checklist provides the top 20 features that we believe are essential for deploying and running an effective technology program.

	Yes	No	Unsure
1. Is the program easy to implement?			
2. Is the curriculum suitable for English Language Learners?			
3. Do the lessons teach relevant technology skills?			
4. Do the lessons reinforce academic basics like reading, writing, and math?			
5. Does the curriculum map to the national academic standards?			
6. Do lesson assessments reflect what students may see on national or state exams?			
7. Are the lessons fun and engaging for the student?			
8. Can students access lessons from multiple grades?			
9. Does each lesson include an audio track for English Language Learners?			
10. Does the program include a Glossary with words, audios, and pictures?			
11. Does the program include 1000's of royalty-free digital photographs?			
12. Will the lessons require minimal preparation time for the instructor?			
13. Do the lessons include step by step animations to teach technology skills?			
14. Are the lesson animations also available in a separate, searchable database?			
15. Will the program work with my existing technology infrastructure?			
16. Are all lessons and content delivered over the Internet?			
17. Is the system easy to use?			
18. Can the system be accessed from school or home?			
19. Are Learning Management and Student Tracking integral parts of the system?			
20. Do all lessons include complete Teacher Lesson Plans?
